

GCDD's 2020 Public Policy Agenda: Disability in ALL Policy

GCDD promotes conceptually coherent public policies that aim to advance the well-being of all Georgians with developmental disabilities, their families, and all who love them, by supporting and advancing policies that create and maintain true community inclusion, such as:

Health and Wellness

We are committed to advancing sound policies that improve the overall health (physical, mental, emotional, and sexual) of people with developmental disabilities and their loved ones.

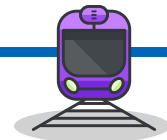

Housing

GCDD supports policy solutions that provide the infrastructure and funding necessary to address the shortage of accessible, affordable housing options for people with developmental disabilities.

Transportation

Reliable transportation options are critical to ensure people with developmental disabilities are truly included in all aspects of communities. GCDD supports policies that improve current transportation options.

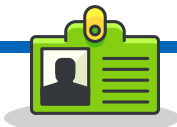

Education

Inclusive education policies, starting with early childcare settings and continuing through postsecondary education, are necessary to assist Georgians with developmental disabilities in reaching their full potential.

Employment

GCDD supports Georgia's vision for a public system that funds employment supports first. We will work to advance policies that improve competitive, integrated employment options for Georgians with developmental disabilities.

State Budget

We believe Georgia's budget highlights our state's priorities, and GCDD strives to educate lawmakers on the importance of maintaining/increasing budget line items that impact Georgians with developmental disabilities.
